The programme's prescribed period of study is equivalent to 120 ECTS. The name of the study programme is AP Graduate in Construction Technology and gives the graduate the title Academy Profession Degree Programme in Construction Technology.

Diplomas from Danish University Colleges

Diplomas from Danish University Colleges are issued digitally in .pdf format only. We do this to save the world's limited resources and, not least, to save our graduates the challenges they would face should they lose a hard copy of the diploma.

The graduates can forward the diploma to third parties or download the diploma to their own storage devices as well as send it as an attachment to an email or through digital recruitment systems when applying for jobs.

Verification of the authenticity of the digital diploma

On the diplomas there is a link to a verification database and a verification ID. Through this database, you can upload the digital diploma received from one of our graduates and enter the verification ID as stated on the diploma.

Our database will then search and compare with the diploma just uploaded; thereby verifying whether the uploaded version is identical to the VIA-issued diploma as well as the diploma's authenticity.
